

2-hour ESCAPE Seminar – at PULSE CHECK 2012

**Emergency Services Control of Aggressive Patients Education**

Assaults resulting in injuries to EMS personnel have and will continue to escalate throughout the next decade. While over five percent of all EMS calls involve a violent patient, few agencies provide training to effectively address this growing problem. This hands-on, interactive program provides EMS professionals with simple techniques that can be easily applied to any aggressive person. Based on a foundation of medically accepted and liability conscious techniques, E.S.C.A.P.E. teaches you how to safely control patients so you can provide necessary medical treatment and to defend against unexpected assaults.

Lead Instructor: Shawn Tompkins

Shawn has been a Firefighter and Paramedic in the Upstate New York region for 16 years. An avid martial arts participant, he holds black belts in Karate and spent years as a certified *Violent Patient Management* instructor. Shawn is a “*Verbal Judo – Communications and De-escalation*” instructor and a peer fitness trainer with the American Council on Exercise. As an instructor with Protective Consulting Solutions, he has spent hundreds of hours training emergency responders across the country in self-defense and effective patient control techniques.
