**Avoid the 10% Medicare Penalty:
Best Practices for EMS Providers Now That Mandatory Cost
Reporting is Underway**

Tuesday, March 21 | 1 p.m. central

[Register Now for Free](#)

Some EMS providers remain unaware that ALL ground ambulance providers are required to provide cost data to CMS, and the first reporting period is already underway. Even if you understand the submission requirements, there are still some best practices to learn that can help the process run more smoothly. In this webinar, Digitech's cost reporting experts as well as client guest speakers will review the current state of the mandatory cost reporting cycle, share examples and tips from EMS providers' experiences in the field, and offer insights and resources that will help you avoid the 10% Medicare penalty that CMS will impose if data is not collected and reported accurately.
